Research Profile

Health sciences researcher and current Master's student in Epidemiology and Biomedical Data Science at the University of Oulu, with 4+ years of applied experience in statistical research and health data management across international settings. Six peer-reviewed publications in high-impact journals spanning cardiovascular epidemiology, maternal health, and machine learning applications in public health.

Education

MHSc in Epidemiology and Biomedical Data Science · University of Oulu, Finland 09/2024 – Present

- Thesis: *Environmental Inequality and Mental Health: A Geospatial Analysis in the Northern Finland Birth Cohort 1966*
- Applying spatial analysis and GIS methods to large longitudinal cohort data

BSc in Statistics · Khulna University, Bangladesh 02/2016 – 03/2020

- Thesis: *Factors Associated with Age of Mother at First Birth in Albania: Application of Quantile Regression Model*
- Contributed to 2 peer-reviewed publications during undergraduate study

Research & Work Experience

Data Management Officer · icddr,b, Dhaka, Bangladesh 07/2023 – 08/2024

- Managed data for a mixed-methods healthcare study ensuring ethical compliance and participant confidentiality
- Designed and field-tested data collection instruments to capture sensitive behavioral and clinical data
- Cleaned and validated 458 survey records using R, SPSS, and Epi Info
- Developed automated R scripts for tabulation and visualization; prepared datasets for statistical analysis in collaboration with senior statisticians
- Designed and conducted workshops on sample size determination, quantile regression, and qualitative data analysis using ATLAS.ti

Data Analyst · Twinbit Limited, Dhaka, Bangladesh 03/2021 – 07/2023

- Analyzed app growth metrics and developed App Store Optimization (ASO) strategies, boosting platform visibility across multiple markets
- Conducted competitive analysis and applied statistical techniques to assess data quality and interpret complex datasets
- Facilitated onboarding workshops on analytics dashboards and ASO tools for new team members

Research Assistant · Khulna University, Bangladesh 07/2019 – 06/2020

- Analyzed DHS data using SPSS and R, contributing to 2 peer-reviewed publications on maternal and women's health
- Applied quantile regression and advanced statistical modeling to identify determinants of health disparities

Methods & Technical Skills

Programming	R, Python
Statistical software	SPSS, Stata, Epi Info, MPlus, ATLAS.ti, Matlab
Visualization & GIS	QGIS, Power BI
Office & productivity	MS Word, Excel, PowerPoint; LaTeX

Publications (6 peer-reviewed articles; selected below)

Khan ZI et al. *Prevalence and determinants of hypertension in South-Asian urban communities.,* Journal of Human Hypertension, 2024.

Khan ZI et al. *A comparative study of machine learning algorithms for predicting domestic violence vulnerability in Liberian women.,* BMC Women's Health, 2023.

Khan ZI et al. *Trends and patterns of inequalities in using facility delivery among reproductive-age women in Bangladesh.,* BMJ Open, 2022.

Khan ZI et al. *Three further publications on maternal health, mental health, and chronic disease epidemiology.,* Heliyon; Clinical Epidemiology and Global Health, 2021–2023.

Conferences & Presentations

- Accepted for poster, *The 6th Paula Rantakallio Symposium on Birth Cohorts and Longitudinal Studies* (2026) — Environmental Inequality and Mental Health
- Co-author (Poster), *25th International AIDS Conference* (2024) — STI diagnosis discrepancies among female sex workers in Bangladesh
- Co-author, *International Conference on STEM & 4th Industrial Revolution* (2022) — Depression and stress among students during COVID-19

Teaching & Facilitation

Guest Lecturer · University of Oulu, Finland — April 2025

- Delivered a lecture on *An Overview of Breast Cancer* to medical faculty students; independently designed the presentation incorporating epidemiological data and interactive discussion elements

Workshop Facilitator · icddr,b, Dhaka, Bangladesh — 07/2023 – 08/2024

- Designed and conducted sessions on sample size determination in qualitative research, application of quantile regression in public health, and qualitative data analysis using ATLAS.ti

Volunteering & Community Engagement

- Executive Member, Oulun Arctic Tigers Ry, Oulu, Finland (01/2026 – present)
- Volunteer, European Public Health Conference, Helsinki (11/2025)
- Volunteer, Oulu Cultural Capital 2026 (02/2025 – present)
- Volunteer, Colorful Restaurant, Multicultural Centre Villa Victor, Oulu (06/2025)
- Organizer, Pitha Utshob — Bangladeshi Cultural Festival, Oulu (01/2026)
